MAIN ACTIVITIES OF ORGANIZATION

Products Category:

At present we are manufacturing & marketing according to ACCORD / ALLIANCE/RSC recommendations.

- All Type Fire Extinguisher & Fire Fighting Equipment's.
- Total Fire Safety Equipment's.
- Also installation of Fire Hydrant System.
- Fire Sprinkler System.
- Fire Alarm & detection System. (Addressable & Conventional).
- Fire Resistant Door.
- Industrial Compliance Signs
- Industrial Lightning System (LPS).
- P.A System (Public Address System).
- Fire Killer. (Throwing Type Fire Extinguisher)

Md. Tarak Aziz | Managing Director |
Arsi Fire International

Refilling & Servicing:

- ABCE Dry Chemical Powder Fire Extinguisher.
- CO2 Fire Extinguisher.
- AFF-Foam Type Fire Extinguisher.
- Set Foam Fire Extinguisher.
- Argus (CO2 & DCP) Fire Extinguisher. (System Fire Extinguisher).

QUALITY POLICY

Arsi Fire International, Our endeavor is to provide better services viz. Servicing, Hydro testing, Re-filling, Supply & installation of firefighting equipment's & fire saving appliances' in sea going various industries. Every customers of our organization must fine that:

- They can communicate us.
- We lessen and promptly respond to their needs.
- We are reliable and do what we say we will do.
- We provide the right service on time every time

The aim our quality policy is to continuously improve in the quality standards' and procedures in place and to reinforce the integrity of our operational procedures:

Total Fire & Electrical Solution According To:

Thanks & best regards

Md. Tarak Aziz | Managing Director |

Arsi Fire International.

Fire Alarm System (Addressable & Conventional)

Addressable Fire Alarm System

Addressable manual call point (mcp) with re-settable (non breaking) glass additional volt free contacts for local interfacing (i.e. PIZ camera preset) two part plug-in-construction with base mounted termination allows for easy installation and connection. MCP can be addressed and plugged into base at a time of commissioning. Electronically addressed suitable semi-flush and surface mount installation.

Two parts construction with base mounted termination allows easy installation. Evacuate only or alert/evacuate mode can be set through handheld programmer. Remote start input can be used to co-operation with others systems. Strobe provided by high intensity LED cluster electronically addressed. Compatible sound with sounder base (i-9402/c-9402) conventional sounder and strobe version part number- C.

Conventional Fire Alarm Panels

1/2/4/16 zone conventional fire alarm panels. Both end of line resistor and active end of line can be used. Day/night mode selected. Zone isolate control one man test. Key-control evacuate over-ride. Repeater is available for GST 108 fire alarm output for remote alarm glass change terminal for remote control active EOL enables multiple alarm reporting from same zone. Active EOL max 15 fire detectors and infinite manual buttons each zone zone resistor EOL up to 25 detectors and infinite buttons each zone.

Addressable Fire Alarm Panels

Single loop panel can connect up to 128 addressable device 8 zone with manual intervention and control self configurable via panel keyboard easy commissioning making the GST 100 an ideal product for electrical installers.

Hose Rack ASsembly

SRI's hose rack assembly is located inside buildings at the wet or dry riser outlet. It features a rack in which hangs the layflat fire hose (30m). An automatic release mechanism allows Water to flow through the hose after removal of the hose and nozzle. The rack is available in sizes of 1-1/2" and 2-1/2". There are two methods of mounting the hose rack. One is by using a wall bracket and the other is by fixing onto a right angle valve.

Specification

ABCE Dry Powder	CO2
Temperature Range : -20°C-+55°C	-10°C-+67.5°C
Spraying Range : ≥ 4m	> 2.5m
Working Pressure : 14 Bar	150 Bar
Pressure (Hydraulic Test) : 25 Bar	250 Bar

Product name

Hanging Automatic Fire Extinguisher Ball

Material	90 ABC Dry Powder
Weight	1.3KG
Automatic Reaction Time	3 second
Color	Red, Yellow & Gray
Packaging Carton Size	56x38x38.5 cm
Temperature Range	60°-68° C

Fire Extinguisher Refilling System

Refilling & Servicing : ☐ ABCE ☐ CO2 ☐ FOAM Type ☐ Argus Fire Extinguisher

Refilling Speciality

- ☐ The Workshop has Available Space. ☐ Good Quality Chemical in the Right Way For Fire Extinguisher Refilling & Servicing, Manner.
- ☐ Very Experienced Person Technician section is done. There is Enough Man Power.
- ☐ All Type of Chemical has Sufficient Stock. ☐ We guarantee our refilling fire extinguisher 1 (One) years
- ☐ At the time of refilling & servicing of your extinguisher, if any spares are found damage / defective / missing will be charged separately for replacement. The old me will be returned back.
